

Teaming With Technology

FingerPro ID and Digital Livescans

FingerPro ID is ideal for employee background checks, security clearances, professional certifications, criminal booking, airport worker badging, healthcare professionals, childcare employees, Class III firearms permits, immigration, housing, drug testing, banking and real estate licensing, fingerprinting service providers and many others.

Easy to Use Interface Improves Workflow Efficiency

The FingerPro ID livescan software is extremely easy to use with nothing to memorize; has no foot pedals; and is fast, reliable, and includes everything you need to quickly scan, encrypt, save and Transmit fingerprint records. FingerPro ID can also print the FD-258 cards fingerprint cards. Unlike ink fingerprinting, with FingerPro ID you can scan once and print as many cards required for each individual that needs a CHRC.

4-Point Image Quality Check Eliminates Guesswork

The 4-Point Image Quality Check relies on the FBI's own image quality scoring algorithm and includes: (1) large image viewing window, (2) color-coded indication of the likelihood of the image passing or failing, (3) and (4) two image quality scores that again indicate likelihood of pass or fail. Furthermore, the software supports rapid rescanning and two modes of operation that allow the fingerprint technician to set the scanning pace that works for him or her. This reinforces good scanning techniques and the technician's confidence that the fingerprints he or she collects will pass FBI scrutiny.

Secure Personally Identifiable Information

Personally Identifiable Information (PII) is protected through file encryption and multi-layer password protection. User roles can also be assigned to individual users of the FingerPro ID software and the entire system can run completely standalone or it can run on a network protected behind your own firewall.

Scanner Options:

Greenbit DactyScan84c

- ✓ 1FBI IAFIS IQS APP.F Certified Livescan
- ✓ ISO/IEC FCD 19794-4
- ✓ ANSI/NIST-ITL 1-2000/2007
- ✓ 3.2" x 3.0" 10-Print at 500 dpi
- ✓ 25 frames/ second-4 slaps
- ✓ 27 frames/ second -rolled prints
- ✓ Small Size: 5.8" x 6" x 5.8"
- ✓ Weighs 3lbs
- ✓ USB interface (derives power from computer)

Greenbit Multiscan527g

- ✓ FBI Certified and Approved Palm and 10 Prints
- ✓ Up to 8 frames per second
- ✓ 500 DPI, 256 Gray Scale
- ✓ Weighs only 8lbs
- ✓ Captures 10 Prints and Palms
